

... Food Service Instructions

◆ Deep Fryers ◆

- ❖ Fill empty fryer to fill line with clean water.
- ❖ Add 16oz **KC 1000**® for every 5 gallons of water.
- ❖ Simmer just below boiling point (approximately 180°F) for 10 to 20 minutes.
- ❖ Turn off fryer and use the hot solution in the fryer to remove the grease buildup on areas above the water line. Wipe with clean damp cloth.
- ❖ Empty fryer and rinse and dry thoroughly with water before refilling with oil.

— Helpful Hints —

- ❖ During set-time use fryer as dip-tank for fryer baskets and other small kitchen utensils. Simmer in fryer for 5 minutes, then wash in dishwasher.
- ❖ Do not leave aluminum pans in solution longer than 3 minutes.

◆ Garbage Areas ◆

- ❖ Spray garbage containers and areas with **HEAVY**.
- ❖ Set-time is 5 to 10 minutes.
- ❖ Re-apply if necessary to remove stubborn grime.
- ❖ Rinse or hose area thoroughly.

— Helpful Hints —

- ❖ **KC 1000**® is very effective in eliminating odors and flies. Be sure to hose area thoroughly and remove all garbage regularly.

◆ Soaking Tanks ◆

- ❖ Fill sink or tank with as **hot** water as possible.
- ❖ For every 10 gallons of **hot** water add 1 gallon of **KC 1000**®.
- ❖ Soak pans, racks, trays, stove grates, etc. for 20 minutes.
- ❖ Some scouring may be necessary.
- ❖ Wash in dishwasher.
- ❖ Solution may be reused.

◆ Coffee Urns ◆

- ❖ Spray urns with **HEAVY**.
- ❖ Set-time is 3 minutes.
- ❖ Rinse well.

◆ Ice Cream Machines ◆

- ❖ Use **HEAVY** to run through machine and clean all parts.
- ❖ Wipe surfaces with clean damp towel and then polish with **LIGHT** and a dry clean cloth.

◆ Refrigerators ◆

- ❖ Spray surfaces with **MEDIUM**. Allow 3 to 5 minutes set-time.
- ❖ Wipe with a clean damp cloth.

We Recommend the Use of KC Products' KolorCode System® for Convenient Mixing and Storing in 5-gallon pre-Marked Dispensers — this Will Control Over-Mixing and Waste

	Spray Bottle	Gallon
HEAVY	¾ Cup	3 Cup
MEDIUM	¼ Cup	1 Cup
LIGHT	1 Tsp	¼ Cup

◆ ◆ ◆ Helpful Hints ◆ ◆ ◆

- ❖ Heat (between 140°F and 180°F) greatly increases the effectiveness of **KC 1000**®. If you will be using **KC 1000**® immediately after mixing, always use **hot** tap water to dilute to recommended ration. Where applicable, apply to heated surfaces.
- ❖ Water is an important ingredient in the performance of **KC 1000**®. Do not use a heavier concentration than necessary, but do apply liberally. When the area being cleaned dries prematurely, the chemical action of **KC 1000**® stops. Re-wet the surface with water or more **KC 1000**®.
- ❖ **KC 1000**® uses advanced surfactant technology. This highly advanced formulation breaks down the molecular structure of grease and grime. You must allow it time to work. Follow all recommended set-time instructions carefully.
- ❖ To apply **KC 1000**® quickly and easily to large areas, we recommend the use of a hand-pump sprayer.
- ❖ Never leave aluminum in the solution longer than 20 minutes.
- ❖ Do not place coated baking pans in solution.

Grills ◆ Ovens ◆ Broilers

- ❖ Heat surface to be cleaned to 150°F.
- ❖ Pour **HEAVY** onto grill and broiler surface to cover. Spray ovens.
- ❖ Set-time is 2 to 3 minutes.
- ❖ Use steel scrubber if necessary on built-up grease.
- ❖ Scrape grease and cleaner into grease pans for disposal and to clean grease pans.

— Helpful Hints —

- ❖ Be sure surface temperature remains at 150°F during cleaning.
- ❖ If surface dries out during set-time, add **hot** water.
- ❖ For hood filters spray with **HEAVY** thoroughly. Set-time is 5 to 10 minutes. Wash in dishwasher.
- ❖ For self-cleaning hoods, use **HEAVY** in place of hood degreaser.

◆ Wet Steam Tables ◆

- ❖ Spray heated steam table with **MEDIUM**.
- ❖ Scrub if necessary.
- ❖ For heavily soiled table, fill water reservoir with **hot** water. Add 3 or 4 ounces of **KC 1000**® and allow to boil out.

◆ Silver Soak ◆

- ❖ Use 2 ounces **KC 1000**® per gallon of **hot** water in silver soak.
- ❖ Wash in dishwasher as usual.

— Helpful Hints —

- ❖ If silver is badly spotted or dull, place in a hotel pan. Fill with **hot** water and 2 ounces of **KC 1000**® and simmer at 180°F on grill or stove burners until silver is shiny.
